

NZAP Membership Statistics

Overall membership numbers

Notes:

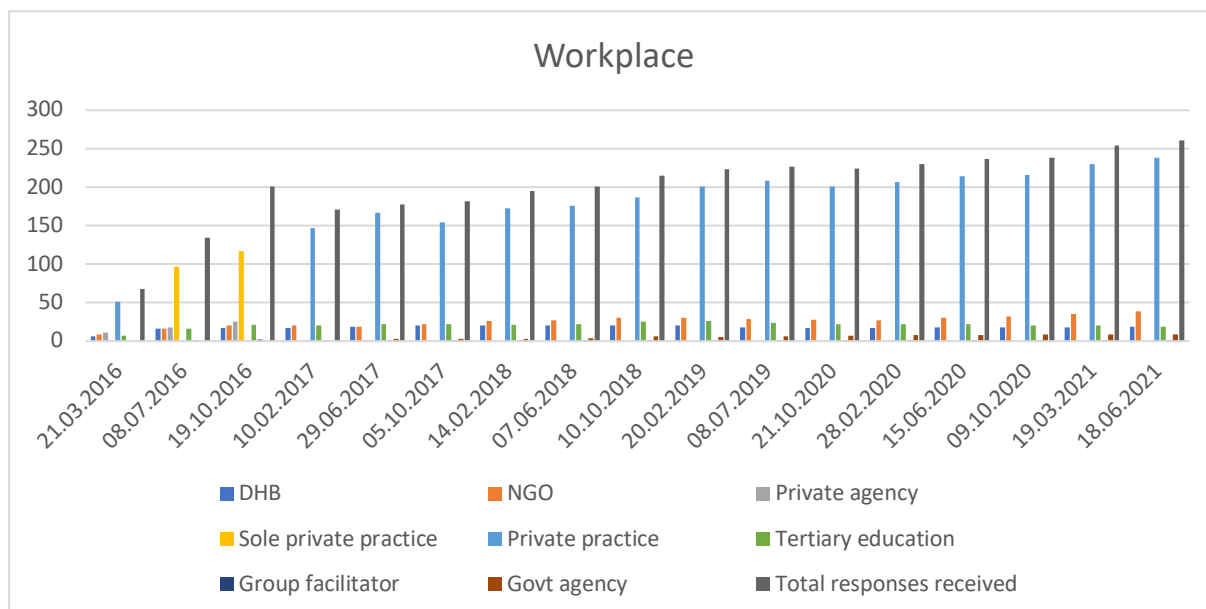

- This graph (and many of the following graphs) covers the period 17.07.2015-18.06.2021.
- Prior to 17.07.2015 membership statistics included Correspondents, which was incorrect as Correspondents are not members.
- This graph includes the total number of members at each period, as well as breaking it down into the different membership categories.

Number of members who joined NZAP via registration

Notes:

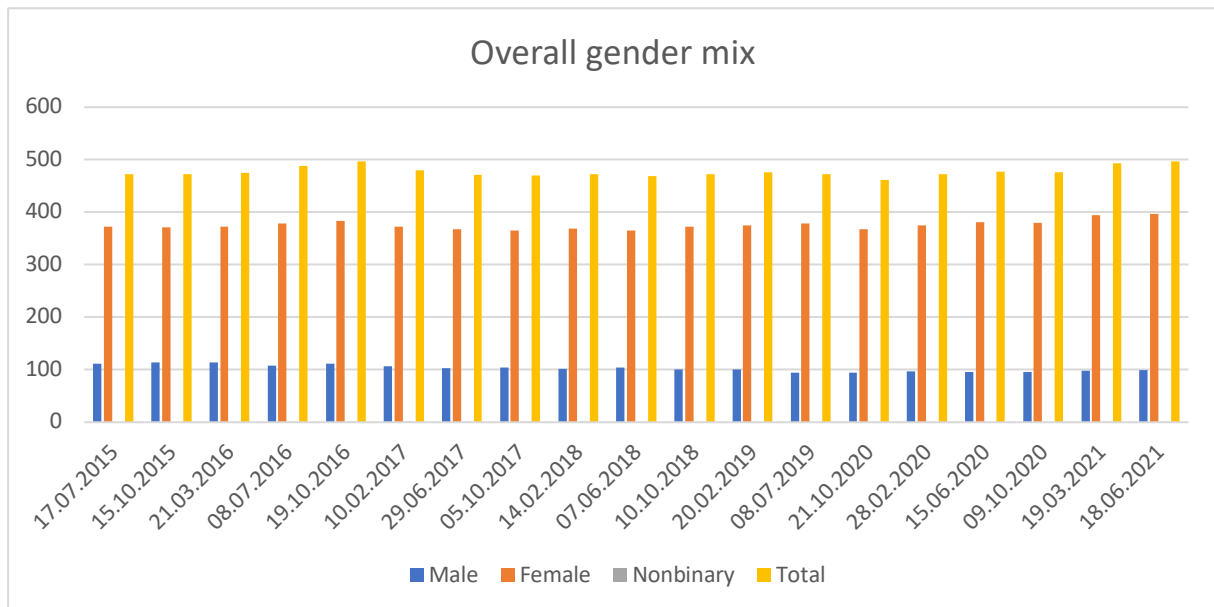

- This refers to their registration status at the time of becoming a member of NZAP, and not their current registration status (which may have changed).
- This data was not reported on prior to 21.03.2016.
- This graph includes the total number of members at each period, as well as breaking it down into the different membership categories.

Overall gender mix

Notes:

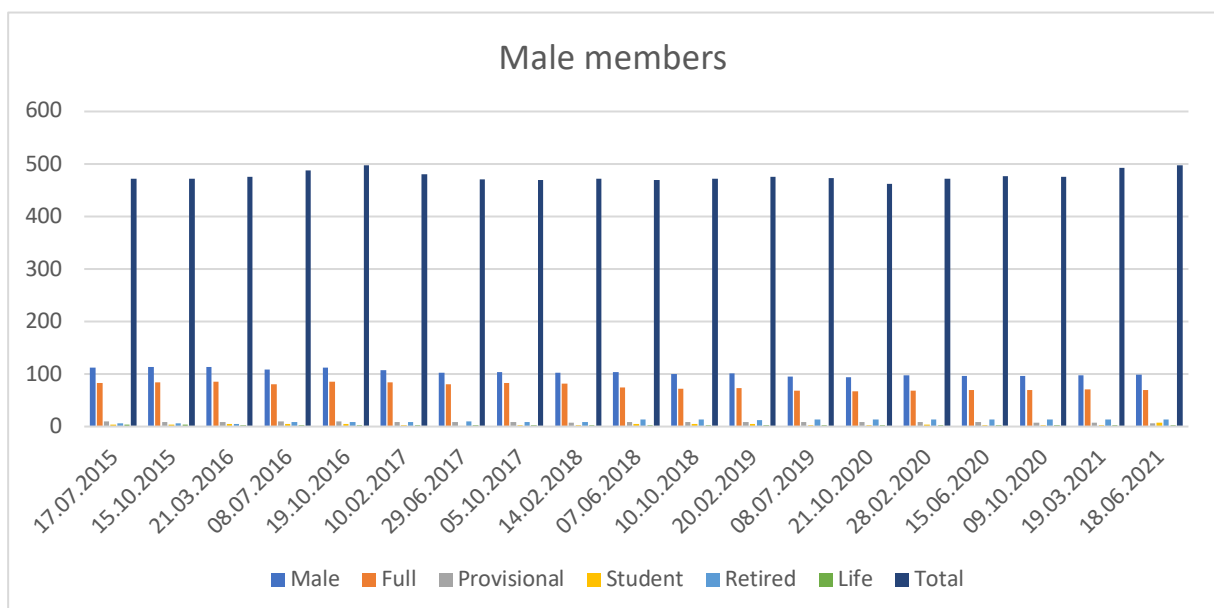

- This table shows the total number of members who self-identify as male, female or non-gender in each period.
- This data was not reported on prior to 17.07.2015.

Number of male members

Notes:

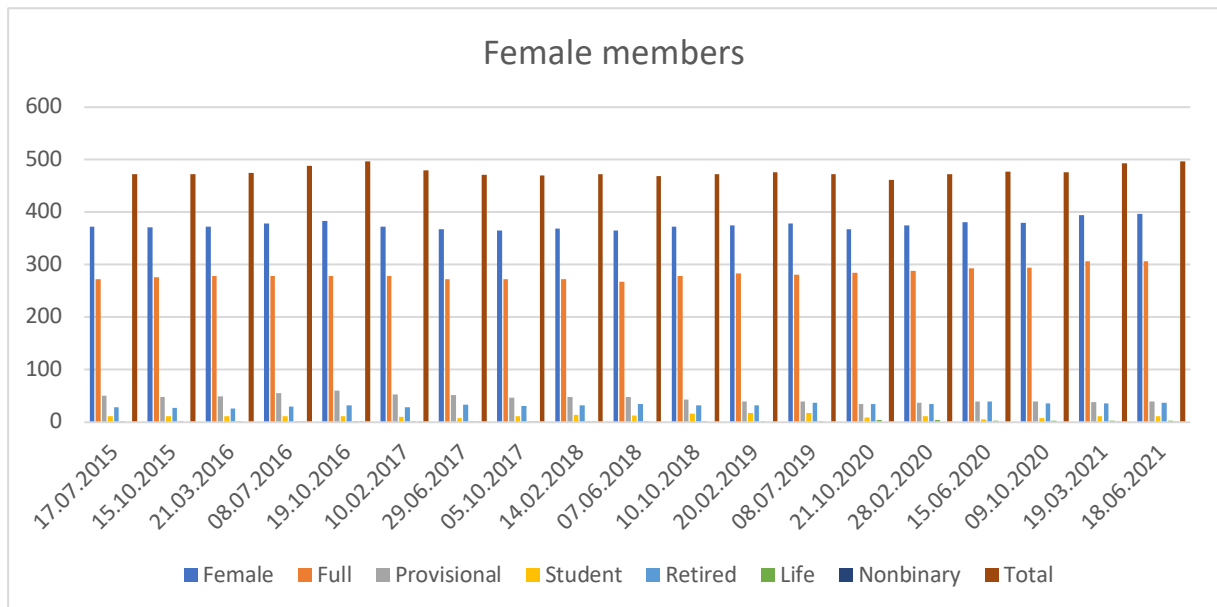

- This table shows the total number of members who self-identify as male in each period, broken down according to their membership type.
- This data was not reported on prior to 17.07.2015.

Number of female members

Notes:

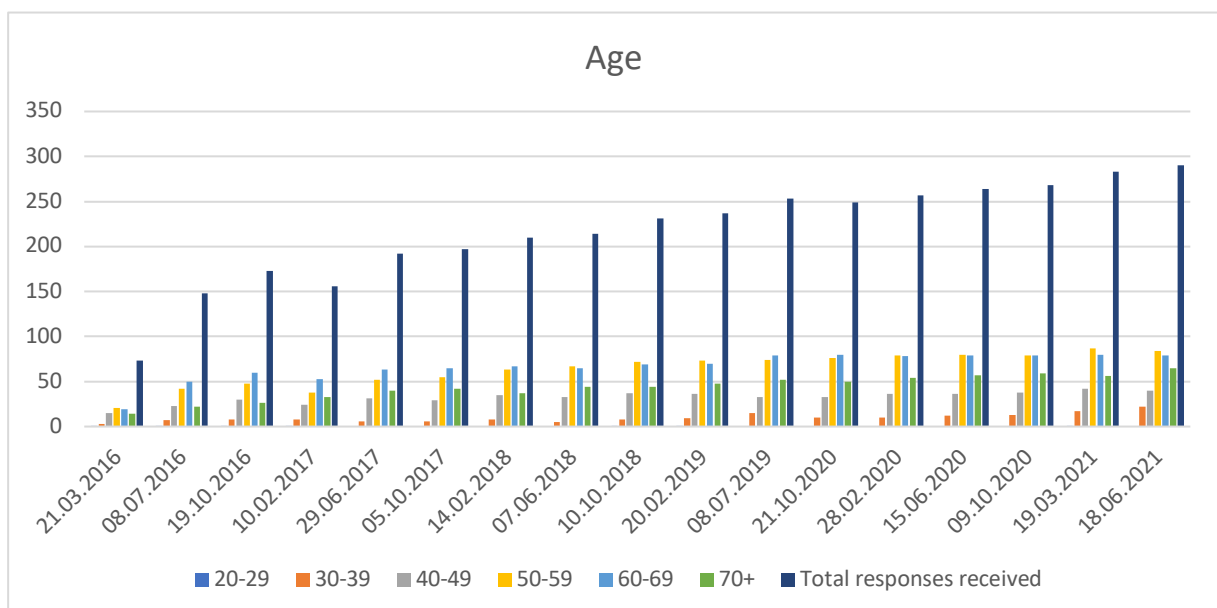

- This table shows the total number of members who self-identify as female in each period, broken down according to their membership type.
- This data was not reported on prior to 17.07.2015.

Age

Notes:

- Not all members have provided this information; the final category for each period shows the total number of members who have responded to this question.
- This data was not reported on prior to 21.03.2016.

Ethnicity

Notes:

- Not all members have provided this information; the final category for each period shows the total number of members who have responded to this question.
- This data was not reported on prior to 21.03.2016.
